

Limited IT resources and tightened capital budgets are a sign of the times today. Provide your company with a strong ROI and the ability to do more with less:  
**Envysion's Managed Video as a Service (MVaaS)**

Envysion is an award-winning innovator in web-based, centrally-hosted video management that is redefining video surveillance enabling customers to See the Results. The convergence of Software as a Service (SaaS) and video surveillance eliminates the complexities of resident software and server management common in today's traditional applications.

Customers benefit from an enterprise-class managed video platform:

- **No Software**—nothing to download, configure or upgrade
- **Seamless Upgrades**—never worry about version control again
- **POS Integration**—True TCP integration with the world's leading POS vendors
- **Remote Access**—100% web-accessed, no special remote software required
- **PCI-DSS Compliant**—will not compromise our compliance efforts
- **Ease of Use**—Intuitive web-browser interface ensures company-wide adoptability with little to no training
- **Strong ROI**—improve operations, increase span of control, reduce shrink and add +150 basis points of profitability
